STRONG 2 YEAR FIELD GROWN, BUDDED

ROSES

We wish to advise that our roses are grown outdoors from beginning to finish, making them thoroughly hardy. That is why we advocate fall planting. By planting in the fall, you gain at least six months on all roses planted in the spring, so they have become established and begin growing just as soon as the first warmth of spring begins.

Only field-grown, hardy roses can be planted in fall safely.

HYBRID TEA ROSES

(\$1.00 each, except where noted)

ALEX HILL GREY—Lemon Yellow.
